Achievements and outlook

a joint company of Alcatel Space, Alenia Spazio, EADS Astrium GmbH, EADS Astrium Ltd, GSS and Thales

4

Achievements and outlook (1/2)

- On **December 21, 2004** ESA and Galileo Industries in its function of prime contractor sign the pre-contract ("ATP") for the "In Orbit Validation" (IOV) phase – GALILEO is finally kicked-off!
 - The objectives of the ATP with a contract value amounting **€150 million** and a duration until **June 30, 2005** are:
 - Start of development of **critical hard- and software** (→ „Long Lead Items“)
 - Finalize the **procurement process of all N-2 subcontracts** (subsystem level)
 - By **mid-2005** ESA and Galileo Industries will sign the full IOV contract worth **€1 billion** and a duration until **December 31, 2008**
 - From **2008 until 2010** the FOC ("Full Operational Capability") phase with an estimated contract value of approx. **€2,5 billion** will take place
- **Galileo Industries intends to become the prime contractor also for the FOC phase!**

a joint company of Alcatel Space, Alenia Spazio, EADS Astrium GmbH, EADS Astrium Ltd, GSS and Thales

5

Achievements and outlook (2/2)

- In **January 2005**, the GSTB V2 B test satellite passed **successfully** the **Critical Design Review (CDR)** with ESA and is scheduled for launch with Soyuz from Baikonur, Russia, in **December 2005**
